Software Engineer | Java Backend

EDUCATION

FPT University

Bachelor of Software Engineering

Ho Chi Minh City, Vietnam

2023 – 2027 (Expected)

TECHNICAL SKILLS

Programming: Java, TypeScript, SQL, Bash.

Backend: Spring Boot 3, Spring Security, Spring Data JPA, REST APIs, PostgreSQL, Redis, WebSocket/SSE, JobRunr.

Testing: JUnit 5, Mockito, Testcontainers.

Cloud and DevOps: AWS (EC2, ECS, S3, Lambda, RDS, DynamoDB, VPC, IAM), Docker, CI/CD, AWS SAM, CloudFormation.

Frontend: React, Next.js.

Tools: Linux, Git, Maven, Jira.

Languages: English (IELTS 6.0), Japanese (JLPT N5; JLPT N3 result pending).

EXPERIENCE

AWS VietNam Company Limited

Software Engineer Intern

Ho Chi Minh City, Vietnam

08/2025 – 11/2025

- Completed a 12-week intensive AWS program covering compute, networking, storage, databases, security, serverless architecture, and infrastructure as code.
- Designed and deployed serverless backend workflows using AWS Lambda, API Gateway, DynamoDB, AWS SAM and Docker.
- Built and troubleshoot cloud infrastructure involving VPC, IAM, Route 53, Auto Scaling, RDS and CloudFormation.
- Integrated AI workflows using Amazon Bedrock, Gemini and Retrieval-Augmented Generation (RAG) as part of the BandUp platform.

FEATURED PROJECTS

Smartlive – PropTech Management Platform

Team Lead | Backend & DevOps, Team of 8 developers

11/2025 – 03/2026

- Led backend architecture and API design for a multi-tenant property management platform serving more than 2,000 active users, using Spring Boot, Spring Security, PostgreSQL and Redis.
- Owned production infrastructure and deployment operations, including Docker-based services, server configuration, Cloudflare Tunnel/Zero Trust and CI/CD pipelines.
- Implemented a blue-green deployment workflow to support safer releases and reduce service interruption during deployments.
- Coordinated API contracts and technical integration across backend, web and mobile developers in an 8-member engineering team.

BandUp – IELTS Learning Platform

Team Lead | Backend, Team of 4 developers

08/2025 – 12/2025

- Led development of a Java 21 and Spring Boot backend for an IELTS learning platform covering authentication, test workflows, user progress and AI-assisted features.
- Developed backend services using Spring Security, Spring Data JPA, PostgreSQL and Redis, with JWT/OAuth2 authentication and role-based access control.
- Integrated AWS S3 and CloudFront for media delivery, payment and AI services, and containerized application services with Docker.
- Built automated backend tests using JUnit 5, Mockito and Testcontainers for service and persistence-layer validation.

HONORS AND AWARDS

3rd Prize – SEAL Hackathon, FPT University

Led a team building an Agentic RAG and Multi-Agent System.

04/2026

50% Academic Scholarship, FPT University

2023 – 2027

LEADERSHIP AND MENTORING

Technical Mentor

Java and Object-Oriented Programming

Ho Chi Minh City, Vietnam

- Mentored 3 peers in Java and OOP through hands-on implementation, code reviews, debugging and system design guidance.
