Education

FPT University

- *Bachelor of Software Engineering*
- 2023 – 2027 (Expected)
- *Ho Chi Minh City, Vietnam*

Honors & Awards

- 50% Scholarship at FPT University Scholarship Exam (for all semesters)
- 3rd Prize Winner - Seal Hackathon, FPT University (Team Leader - Agentic RAG & Multi-Agent System).

Experience

Software Engineer Internship | AWS VietNam Company Limited

8/2025-11/2025

- Participated in the company's internal training program, studying and working with AWS core technologies such as EC2, ECS, S3, VPC, Lambda.
- Developed an internal project assigned by mentors to apply the training knowledge, handling business logic and integrating internal services.
- Worked in an Agile/Scrum environment, joined daily stand-ups and received code reviews from senior engineers to improve code quality and clean-code practices.
- Successfully completed internal assessments and received positive feedback for fast learning ability and proactive attitude.

Skills

- **Technical:** Java, Spring Framework, TypeScript, Next.js, PostgreSQL, Redis, AWS Services, Lua, Bash, JUnit, Testcontainers.
- **Tool:** Git, Linux, Docker, RESTful API, Maven, Jira
- **Language:** IELTS 6.0, JLPT N4

Projects

Smartlive – PropTech Management Platform

11/2025 – Present

- A production-grade multi-tenant Web & Mobile platform for apartment/building management, supporting resident management, internal operations, and real-time notifications. Target scale 10,000+ active users, successfully launched production in 02/2026.
- **Position:** Co-Founder & Leader (Team of 8 developers).

- Led the technical vision from startup concept to a fully operational PropTech platform, working directly with stakeholders to translate business requirements into system design.
- Architected and owned the backend system with a multi-tenant architecture, ensuring strict data isolation, scalability, and production readiness.
- Acted as Core DevOps: Managed production servers, built zero-downtime CI/CD pipelines featuring Blue-Green deployments, and configured Cloudflared Zero Trust for secure networking.
- Coordinated the development team, overseeing API design and seamless integration flows between frontend and mobile apps.
- **Tech stack:**
 - **Backend:** Spring Boot 3, Spring Security, WebSockets, SSE, JobRunr, Firebase Cloud Messaging (FCM).
 - **Frontend:** React (Vite), React Native.
 - **Ops & Storage:** Docker, Cloudflared (Zero Trust, Cloudflared Tunnel), CI/CD (Blue-Green Deployment), AWS S3, AWS Lambda, Redis, PostgreSQL.

BandUp - IELTS Learning System

8/2025 - 12/2025

- An EdTech learning platform to help users prepare for the IELTS exam.
- Position: Team Leader, create and optimize UI/UX in frontend, developing API and support backend team, core devops for CI/CD integration, Containerize and AWS Deployment
- Tech stack:
 - Backend: Spring boot 3, Web socket, Spring Security
 - Frontend: Nextjs, Shaden UI, Tanstack Query
 - AI, Storage: Redis, PostgreSQL, PayOS, RAG, AI SDLC
 - AWS Services: S3, ECS, RDS, Lambda, VPC, ALB, Elastic Cache, ECR, Cloudfront, Bedrock, SQS
- Repo and Architecture: <https://github.com/namdang-fdp/band-up>
- Live Demo: <https://bandup.bughunters.site/>

Blood Donation System Web

4/2025 - 6/2025

- A web for single medical center which decreases donors and doctor's effort in blood donation progress.
- Core frontend developer, handle designing, coding UI, enhance UX, connecting with API.
- Using Nextjs, Tailwindcss, Shaden UI library component, Tanstack Query, Git/Github.
- URL: <https://github.com/namdang-fdp/blood-donation-system>
- Live Demo: <https://bds.akagiyuu.dev>
